Decagon Institute, Lagos — *Software Engineer*

MARCH 2020 - PRESENT

- Built projects with NodeJs, Express Framework, Typescript, React.js, JavaScript, Websockets and GraphQL.
- Handled Database Management Systems with SQL like PostgresSQL and MongoDB(NoSQL).
- Experienced with writing unit using Jest.
- Delivered weekly features following the agile methodology

.

Kontz Engineering Ltd., Lagos — *Web Developer*

AUGUST 2019 - FEBRUARY 2020

- Built the Frontend of clients' applications using React.js.
- Assisted in implementing new API endpoints using Nodejs and Express.
- Conversion of HTML and CSS codes to ReactJS.
- Managed, developed and deployed WordPress websites.
- Built client apps using ReactJs.

TECHNOLOGIES

- NodeJs
- Express Framework,
- JavaScript
- Tailwind CSS
- TypeScript
- ReactJs
- Version Control(Git)
- GraphQL
- Agile Methodologies
- MongoDB
- Blockchain
- Moralis
- Solidity
- Hardhart
- EthersJs
- NextJs
- C# (.NET)
- React-native

PROJECTS

KRYPTO-SWAP:

A Blockchain application that helps to transfer ethereum from one contract address to another, and list out all transactions done on that address with a gif.

Technologies Used - React.js, NextJs, TailwindCss, Typescript, Nodejs, Solidity, Hardhat, ethersJs.

Link: https://krypto-swap.netlify.app/

Metaverse-Chat:

A decentralized social application built on the ethereum network where users can log in with their contract address and chat with other users. It generates an avatar for each user based on their username(contract address).

Technologies Used - ReactJs, NextJs, Javascript, NodeJs, TailwindCss, Moralis.

Link: https://metaverse-challenge-kappa.vercel.app/

NFT Market place:

A decentralized application built on the ethereum network where users can list NFTs, buy and sell NFTs.

Technologies Used - ReactJs, NextJs, Typescript, NodeJs, TailwindCss, Solidity, ethersJs, Hardhat.

Link: https://github.com/vyktoremario/opeanSea-clone

Music-Box:

This is a complete progressive and mobile responsive web application that brings music close to you with ease. You have favourite albums and songs, listening history, access to create a private playlist.

Technologies Used - ReactJs, Typescript, NodeJs, Express, SCSS, MongoDB.
